

A tough female action-hero finally updating the modern role-model that our children so desperately need. Or maybe a figment of imagination that an artist has interlaced with contemporary social critique. But then again, perhaps merely a product of the Military Entertainment Complex. So, who is Salt? This question is waiting to be posed to the hundreds of millions, through writings on the walls, through whispers between friends, on our ways, and in the comfort of our homes. But we, we have preceded it. This is Salt.

Johannes Wahlström, 2015

Who is Salt? deals with the notion of the Military Entertainment Complex. Angelina Jolie hesitates to undertake the role as agent Evelyn Salt, but is nevertheless dreaming of the role as Cleopatra. This is a cooperation of mutual benefit revealed through email conversations found on IMDb and in the Sony Hack of 2014 between Hollywood and the State Department.
